

NAVHDA SANCTIONED TEST CAPACITY CHART

The recommended number of dogs, which may be tested in one day by a judging team, has been established to assist chapters in planning their test schedule. This schedule provides enough time for adequate discussion of test scores between the Judges. A test of a single type is the simplest to run efficiently, and conversely changing from one type test to another always takes some time. The combinations of dog numbers for a test are shown in the following table.

Recommended Number of Dogs per Judging Team

NA & UPT		UPT & UT		UT & NA	
8	0	6	0	5	0
7	0	5	1	4	1
6	1	4	1	3	1
5	2	3	2	3	2
4	2	2	3	2	3
3	3	1	4	2	4
2	4	0	5	1	5
1	5			1	6
0	6			0	7
				0	8

A maximum of two Apprentice Judges can participate per judging team.

When conducting three types of tests with one judging team, Utility Preparatory dogs are considered to be Utility dogs in your calculations of the number of dogs, which can be run. (Use UT and NA table).

Extra capacity is granted to chapters with a history of successful tests run on grounds that they are experienced with and that lend themselves to efficient operations. The maximum number of dogs, which may be run in a test and various combinations, is shown in the following table.

Maximum Number of Dogs per Judging Team

NA & UPT		UPT & UT		UT & NA	
10	0	7	0	6	0
9	0	6	1	5	1
8	1	5	2	4	2
7	2	4	2	3	3
6	2	3	3	3	4
5	3	2	4	2	5
4	4	1	5	2	6
3	4	0	6	1	7
2	5			1	8
1	6			0	9
0	7			0	10

A maximum of two Apprentice Judges can participate per judging team.

When conducting three types of tests with one judging team, Utility Preparatory dogs are considered to be Utility dogs in your calculations of the number of dogs, which can be run. (Use UT and NA table).

No NAVHDA Sanctioned Test shall exceed these maximum numbers.
